

Profilglass S.p.A. is leader in aluminium production and bases its values on sustainability, promoting "development that meets the needs of the present without compromising the ability of future generations to meet their own needs" (Brundtland Report, 1987). It is in our interest to pursue the **right balance between competitiveness, environmental sustainability and social responsibility**, in compliance with all applicable laws and with a view to continuous improvement: for Profilglass sustainability is a journey whose goal is the creation of lasting value for our stakeholders.

ENVIRONMENTAL SUSTAINABILITY

In line with the 3Rs community model (Reduce, Reuse, Recycle) and with the aim of providing a tangible contribution to the ecological transition, towards a circular economy and the reduction of environmental impact, Profilglass sets these objectives:

- the decreased use of energy and natural resources,
- the promotion of the use of renewable energy,
- the efficiency of production processes,
- the reduction of waste produced, especially if hazardous,
- the prevention of all forms of pollution.

SOCIAL SUSTAINABILITY

The wellness of employees and the community, are at the heart of the daily commitment at Profilglass, which translates into:

- respect for human rights,
- inclusion, respect for diversity, and fair treatment,
- professional development and promotion of wellbeing
- prevention of occupational injuries and illnesses,
- elimination of hazards at source,
- reduction of health and safety risks.

ECONOMIC SUSTAINABILITY

Increasingly responsible and sustainable business performance that creates value and meets the needs and expectations of all stakeholders is our ultimate goal, including through a responsible and sustainable supply chain, through the collaboration of all players in the value chain.

Through its activities, Profilglass is committed to contributing to the achievement of the **Sustainable Development Goals (SDGs)** set out in the United Nations 2030 Agenda, defined by the governments of the 193 member countries of the UN in September 2015. Through its ESG initiatives and measures, it makes a particular contribution to the SDGs covering: Good Health and Wellbeing, Quality Education, Affordable and Clean Energy, Decent Work and Economic Growth, Sustainable Cities and Communities, and Climate Action.
